PALM SPRINGS COMMERCIAL BIN RECYCLING PROGRAM

It's Easy. . . .

Recycling is now easier than ever.

This BLUE 3 CUBIC YARD BIN is the place for ALL of your recyclables. You don't need to separate paper from plastic, glass, metal, etc. Place everything recyclable in the blue bin.

We collect your commingled recyclables with clean-burning, CNG-powered vehicles

Next, we transport the recyclables to a Materials Recovery Facility where they are separated by commodity.

Finally, the commodities are shipped off to be processed into new products.

RECYCLE these:

Metal	Steel & aluminum beverage, food & aerosol cans. Clean aluminum pie plates, dinner trays & foil.
Paper	Newspaper, magazines, catalogs, phone books, bulk mail, office paper, computer paper, envelopes, gift wrap, cardboard, food boxes, shoeboxes, paper towel & toilet paper tubes, paper egg cartons.
Glass	Any color of beverage bottles, food jars.
Plastic	Any bottle, jug or container and plastic shopping bags.

DON'T include these:

Animal waste	Mirror glass
Bubble wrap	Motor oil
Cactus	Nursery pots
Concrete	Padded envelopes
Diapers	Paper towels
Dirt	Plastic wrap
Food waste	Rocks
Garden hose	Sharps
Kleenex	Trash
Light bulbs	Window glass
Lumber	

NOTE: Bins containing these or other contaminants may be left uncollected or a service charge added if the responsible party requests a pick up regardless of the contamination.

WASTE AUDIT

If you are interested in increasing waste diversion and perhaps saving money on your trash bill in the process, PSDS would be pleased to perform a FREE, no obligation consultation on waste practices and waste diversion. We fully understand the factors that must be considered when adding residential bin services, including such things as:

- City Code requirements for enclosures
- Maintaining convenience for residents and businesses
- Avoiding the contamination in recycling bins
- Eliminate loose litter caused by overflowing containers

We can help.
